

**700 SERIES POWER CONSOLE**  
**SUPPLEMENTARY INSTRUCTION SHEET**

This 700 Series Power Console has a new power-limiting feature that permits FEEDBACK FINDER™ operation without feedback reaching ear-splitting levels. A limiting circuit at the input of the power amplifier selected for FEEDBACK FINDER operation limits the amplifier to approximately 13% (26 watts) of full rated output.

**IMPORTANT:** To insure full power operation, the FEEDBACK FINDER switch must be returned to the OFF position after setup.
